About me

Python developer and data scientist specializing in NLP. My primary stack is Python, but I also have some experience with Golang.
I am proactive and highly dedicated, a quick learner, and always strive to improve my skills. I also have some experience as a lecturer and a mentor in ML/Python training courses for entry-level specialists.

EXPERIENCE

Role	Description	Dates	Company
Python Engineer	Developed a number of tools for speech processing.	11.2022 – 02.2023	Crowdtesting
Education Mentor	Mentor of the "Data Science" course (module "Mathematics in ML").	12.2022 – ongoing	SkillFactory
Education Mentor	Mentor of the "Python for beginners" course.	10.2022 – ongoing	Netology
Data Scientist	Retrained a model for text generation task, and integrated the new model into company products. Developed a tool for Russian text augmentation.	07.2022 – 09.2022	CYBERBOREA
Python Developer (freelance)	Developed a number of tools for NLP tasks.	05.2022 – 06.2022	
ML Engineer	Developed a number of audio classification models. Collected, preprocessed, and validated data for models' training.	01.2021 – 10.2021	IT ForYou
